FASTING THE RIGHT WAY

**7-Part Guide To Fast Effortlessly
and Unlock The Benefits Of *Rozah***

NOTE BY MURTAZA

I completed my Masters in Pharmaceutical Science with the hope of finding a solution for my problems (Asthma, Chronic Sinus, Fibromyalgia).

Studied pharmacy for 6 years, could not find a cure, and was told to manage my health issues with lifelong medications.

For more than 10 years, I have been a student of Health and Human body. Understanding why we fall sick allowed me to overcome my problems (free from all medications) and now, I share these principles to empower others to reclaim their health, without spending extra time, energy, or money.

My most important discovery was that the human body is designed to **stay healthy effortlessly** as long as we are alive so we can use our 100% energy towards building a life we love!

Health ON Autopilot is a journey into timeless healthy living principles, without modern complexities.

My mission is to guide individuals towards effortless health, ensuring it doesn't hinder their pursuit of a life and business they love. I have been blessed to overcome these obstacles, and I believe you can too.

The goal is to stay healthy and be able to do *Rozah* - Until Our Last Breath.

My humble request for you is don't succumb to information overload or extreme health regimens.

Give your body the gift of health, connect with natural homeostasis to put your **Health On Autopilot**, and to **Live Happy, Healthy & Regret-Free!**

RAMADAN GUIDE FEEDBACK

Salaam bhai, Eid Mubarak to you and your family.

I want to convey a special thank you. This year is my first year in which I could all roza the reason I could is because of you. I have been following your videos and small small tips given by you helped me a lot. I always did alternate day roza or could do only few. But this I can proudly say I could do all at a stretch.

Once again thank you bhai

07:30

The guide is really helpful...

Shukran Jazakallah

We r now training our minds to fast without realizing hunger and thirst and focus on doing ibaadat with more dedication

Murtazabhai

Your talk on fasting tips was really great

I realized I kept having unnecessary amounts of water and implemented your recommendations.

Can already feel the difference

Thank you

Alhamdulillah Shukranlillah

Bhai Murtaza bhai Shakir

Khuda Aapne khair ni jazaa aape , ummeedo tamaam kare ,Ameen

Aapna je 4 video,sherullah ni pehli raate ,je sehat related hata ,yeh meye joya ane ehma amal kidu

Toh last 2 mahina si ,**mara pet ma ghanu problem hato doctor kehla hata ke Collen ma problem che ane ghana badha test karavanu ane MRI karavanu kidu hatu ,magar aa mehaaz moola no mojizo che ke aapna video par amal karvasi mari bimari shifa thai gai , Alhamdulillah Shukranlillah**

Khuda apna Aqa ane Moula TUS ne Umar Shareef ne Taroze Qayamat Lag daraaz ane daraaz karjo Ameen

So true and I gave experienced that when we eat food more than required after fasting, our body and mind doesnt work as swiftly as it does normally

Reply Message

Yes Murtaza bhai....

Your videos are very inspiring and amazing i too had a lot of bloating problems but khuda na shukur after following your videos it had helped me a lot. Khuda tamare khair ni jaza aape.

12:11

Yes it is so true..

I suffered from blaoting and gas during fasts due to excess water intake during sehori. But now after your guidance I feel so relaxed during fasts. Shukran jazilah

Salamun jameel kem cho bhai.. Sherullah il mozzam nu je program aapye kido che .. ye mara waste ghani mohti nemat ane saadaat hati.. aapna instructions na mutabiq amal kidu..

Mara waste it was very difficult ke shehrullah na roza kari saku.. bas yej fikir ke me kem karis, taqat bilkul nathi n m thin n I use to eat alot but wth zero result bcoz I was doing it wth wrong mindset .. spotting thatu hatu.. but as soon as I read ur article.. my mindset changed completely as if a miracle happened n It healed me immediately.. spotting stopped.. n I started roza .. alhamdulillah shukran.

Khuda aapne khair ni jaza aapjo.. Its a true blessing to do roza wth correct mindset.

22:26

Salam murtaza bhai

Hope you're doing well

I have read your tips on fasting

and watched all your videos

I have realised the image of

fasting in my mind was on a

wrong track

I want you to convey a special

thanks to you

Thank you for giving me such an

excellent guidance

Wishing you a good luck 🍀

And hope to see your page grow

more

Once again thank you so much

Ramadan mubarak to you and your family

Salaam bhai

I have been following ur page since quite a time,

U posted a video regarding iftaari to take salt after khake shifa, well I started practicing it and told my bensab(amil saheb wife) n sent ur video to her also,

Initially she was only served khake shifa den I told her khidmat guzar to get salt also and we all started tht habit.

Shukran

Also u posted video abt sehori, dat drink water before food not after as it creates bloating n gas, so I told this in thaal to the ladies, after few days one ben told me that she feels so relived n no more bloating or gas by this practice. Shukran

More i told dis sehori thing to my bensab also, she started practicing it, initially she felt vomiting as she had d habit of drinking water after meal so she stopped it n now she started having it before meal, she felt so relax...

Hello bhai

How r u

Ramzan Mubarak

Ur fasting guidelines helped me alot I m following each steps from sehri to iftari and it really worked out well for me

As u know my doctor told me no for fasting and so do parents but this year i m doing it with very positive energy that i can do it and it ur guidelines are the road for its success

😊 thank you so much for your kind support and help

حديث

صوموا تصحوا

Become healthy by doing *rozah*

*Maulana Ali (SA) advised
Imam Hasan (SA) that the
KEY to good health is Rozah.*

01

THE WRONG WAY

THE WRONG WAY

Rozah is the key to unlocking
the door of good health.

**The KEY Works ONLY If You
Fast The RIGHT Way.**

While fasting the wrong way...
can take you closer to ill-health.

First step is to change the Mindset about *Rozah*
to unlock the door of good health.

**How do I know if I am doing *Rozah*
the right or the wrong way?**

Signs Of Fasting The Wrong Way

1) Gain weight or do not lose weight after Ramadan.

Eating more in sehri and post-iftar to compensate for the time you stay hungry. This indicates Mind is focused on food & feasting, and not on fasting. By doing this, the KEY will not work.

2) Thinking all day about food and iftar.

The Holy month of Ramadan is not about food and tasting different types of recipes for iftar. If you constantly think about food and iftar, then it's a sign you are doing it the wrong way.

3) Feeling tired and fatigued:

Complaining how *Rozah* makes you tired or compromises your work/study. When you fast the right way, it does not take away your energy, but it energizes you physically and mentally.

"I fast for greater
physical and mental
efficiency"

- *Plato*

02

THE MINDSET

THE MINDSET

During Ramadan, your **MIND** can be focused on...

1. Hunger and eating food, or
2. Focused on fasting the right way and prayers

You can't do both.

To fast the right way,
Eliminate the negative mindset of :

- *I have to stay hungry and thirsty.*
- *I will get tired without food and water.*
- *I cannot work/study the same way while fasting.*
- *I need special food in Sehri to not feel hungry.*
- *I need special food after iftar.*
- *My body and mind will get weak.*
- *The fast duration is very long, it will be difficult.*
- *It will be difficult to fast in the summer season.*

Let's replace the above with the Right Mindset...

“There is no illness of
the body apart from
the mind.”

- *Socrates*

MINDSET For Fasting The Right Way

To unlock the doors of good health.

1 Fasting is healing and energizing me:

Tissues and organs are repaired more rapidly during fasting. When the body is healing, you feel more energy and vitality. It is shown to heal and prevent diseases like diabetes, BP, and even cancer.

2 Fasting makes my immunity stronger:

Numerous studies have shown that fasting from dawn to dusk has a powerful impact on strengthening the immune system which protects the body against viruses and even cancer cells.

MINDSET For Fasting The Right Way**3****Fasting makes me younger and helps slow down aging process:**

Fasting has been shown to lower insulin resistance, liver fat, inflammation, and other markers associated with aging.

4**It boosts my mental & emotional health:**

Fasting can improve mental clarity and focus by promoting the production of brain-derived neurotrophic factor (BDNF). Increased BDNF can lead to improved brain function & better mental clarity.

“

**Ramadan fasting is not
training the BODY
to stay hungry**

**It is training
the MIND**

**to help the body
stay healthy effortlessly!**

- Murtaza Shakir

03

SEHRI GUIDELINES

SEHRI GUIDELINES

Mistake of drinking excess water after eating in Sehri:

[Watch Video](#)

Avoiding this mistake helps you prevent bloating, indigestion, gas, constipation, and even fatigue.

Drink 1 or 1.5 glasses of water on an empty stomach 5-10 mins before sehri and avoid drinking large amounts of water after eating.

SEHRI GUIDELINES

How much water to drink in Sehri

Making this mistake of drinking excess water in sehri can put pressure on the kidneys and also interfere with the digestion process leaving you with a feeling of heaviness.

SEHRI GUIDELINES

Special food in Sehri to not feel hungry

 [Watch Video](#)

This guideline will help you eat peacefully the local foods that you would eat normally for breakfast... without worrying about feeling hungry during the day and also prevent overeating which can lead to indigestion.

SEHRI GUIDELINES

Foods to avoid in Sehri:

- ✗ **Packet** and ready to eat foods like cereals, quick oats, instant foods.
- ✗ **Processed** foods like breads, jams, bagels, nutella, biscuits.
- ✗ **Frozen and processed meat** like salami, seekh, sausages, nuggets.

NOTE: It is okay if any of the above is required to be consumed 2-3 times during the month. One must limit the quantity and be mindful of the processed food intake.

SEHRI GUIDELINES

Foods good to have:

- ✓ Homemade wheat roti with meat, eggs, curd, paneer, fresh cream, or beans.
- ✓ Stuffed paratha (eg paneer, peas, potato) with curd, ghee, fresh cream or butter.
- ✓ Boiled eggs, dry fruits with milk/curd
- ✓ Thuli or whole grain porridge with curd or dry fruits or milk.
- ✓ Any other local homemade food - eg: Idli, Poha, Upma, Cheela.
- ✓ A small cup of tea/coffee if it suits you.

REMEMBER : Avoid Overeating

(more about this in the EATING HABITS part)

**“You need to know that
stomach disability and
weakness can be the cause of
all other diseases of the body.
Most stomach diseases are
from overeating.
The greatest enemy of the
stomach is filling it up with
too much food.”**

- Abu Ali Sina
(The Canon of Medicine, Volume 3, Part 13)

04

IFTAR GUIDELINES

IFTAR GUIDELINES

Dont miss this step during Iftar and eating right

[Watch Video](#)

Tasting salt during iftar activates salivary amylase enzyme which helps in digestion.

Along with the above step, **eat slow, chew well, drink water slowly in sips** and taking care of mindful eating practices help the body digest food without any discomfort. **Avoid drinking excess** water at once after iftar.

IFTAR GUIDELINES

This mistake can kill all the benefits of fasting

More hunger does not mean more food.

Most people make this mistake due to the mindset issue. Being mindful of what, how and how much you eat can help you unlock the benefits of fasting.

“Fasting is the
greatest remedy –
the physician within.”

- *Paracelsus*

This physician is activated only
when you fast with the right mindset
and avoid sehri & iftar mistakes

05

EATING HABITS

EATING HABITS

RAMADAN Is NOT About FOOD

**FEASTING AFTER FASTING
KILLS ALL THE BENEFITS OF FASTING**

EATING HABITS

Shift the focus from feasting and eating more to...

- Eat less, **Feed More**
- Eat Less, **Pray More**
- Eat Less, **Serve More**

Eating less does not mean starvation or deprivation, it refers to **eating right** because the majority of people are eating more than required.

1. Right quality (what)
2. Right quantity (how much)
3. Right way (how)
4. Right time (when)

**The body can survive
without food for
over 30 days
if it gets an adequate
amount of water.**

PMID: 20069776

Fasts are not longer than 16 to 18 hours max. The body will take care of itself if you take care of your Mindset.

Four Guidelines For Eating Right

1

RIGHT QUALITY

Simple home-cooked food, or food served at the place of worship. Avoid outside food as much as possible (once or twice a month is okay). **No processed foods and commercial food.**

2

RIGHT QUANTITY

Eat only that much to kill the hunger, not overeat trying to compensate for staying hungry throughout the day. Eat up to 80% of your capacity. If you feel heavy and full immediately after finishing your meal, it's a **sign of overeating.**

[Click here to watch videos on Healthy Eating Habits](#)

Maula TUS recounted yet another pearl of advice from Amirul Mumineen AS **regarding food intake:**

‘Stand up [from your meal] while you still desire more.’

Mauls TUS explained that when a person has had their fill, the stomach sends a message to the brain saying that it is full. However, this message is delayed and often one is already full before the brain receives the message.

Therefore, if one continues to eat until they feel full, they have already overeaten.

Amirul Mumineen AS directive to stop eating even though one might still desire more, allows one to consume the **right amount of food**, leading to **moderation** and ultimately to **rāhat**.

*Source: Reflections: Majlis 3
Ashara Mubarakah 1443 H, Aljamea-tus-Saifiyah, Nairobi*

Four Guidelines For Eating Right

3

RIGHT WAY

Eating mindfully. Eat slowly, chew more, and eat without devices and distractions. 100% focused on eating food peacefully and thankfully. You are not just what you eat, but also **how you eat**.

4

RIGHT TIME

Eating at the time of Sehri and have your dinner after Iftar.

Avoid eating late night or throughout the night if you are awake. Have liquids and water if you stay awake for prayers at night.

[Click here to watch videos on Healthy Eating Habits](#)

PART 5

Eating Habits

Watch The Healthy Eating Video Series

#1: The 5 Point Eating Healthy Pathway

#2: The Real Foods Your Body Need.

#3: Right Way to Eat: How, When & How Much?

#4: Solve Your Eating Problems Forever.

#5: Eat Favourite Foods Without Fear & Guilt

#6: Overeating: Risks & How to Break the Habit

“If you want to get more done in life, eat less food.”

- *Robin Sharma*

Use food as fuel to live and experience life, do not make your life about experienceing food.

Water Intake

When you fast the right way,
the body needs water to flush out toxins.

As we understood in the Sehri mistake,
excess water is not required due to the limited
amount of time...

REMEMBER TO:

Drink adequate water and fluids after the Iftar.

In the summer season:

- Add some salt and jaggery to replenish the electrolytes in case of sweating.
- Adding rose water or basil seeds (tukmaria) also helps in cooling and cleansing.

Water Intake

- Avoid drinking large amounts of water at once, (not more than 300 ml) and space it in the gap of 30 mins to an hour.
- Avoid drinking excess water with meals or immediately after meals.
- 1-2 glasses during Sehri and 5 to 6 glasses post iftar until sleep can be sufficient for most people. (Note: Requirement may vary depending upon weight, climate, or medical condition)
- **Remember - drink water slowly in sips, do not gulp it.**

[Click here to watch YouTube video on all about water](#)

06

NIGHT
SLEEP

NIGHT SLEEP

State of fasting is cleansing and repairing the body, sleep requirements do not have to be similar compared to non-fasting days.

- **When you fast the right way...**
The body can survive on a little less sleep.
An hour less of sleep during Ramadan is fine.
- When you overeat, eat all unhealthy and processed foods, the body needs more sleep.

Do not stay awake at night for any other purposes apart from night prayers (Bihori) as per the required time. Prioritizing your night sleep is equally important.

Man is required to seek
comfort and rest.
Allah Ta'ālā states in the Quran:

وَجَعَلْنَا نَوْمَكُمْ سُبَاتًا

And we have made your sleep
[a means for] rest (78:9)

Sleep allows the body to
recuperate and is especially
beneficial during times of illness.

*Source: Reflections: Majlis 3
Ashara Mubaraka 1443 H, Aljamea-tus-Saifiyah, Nairobi*

NIGHT SLEEP

Important points for a good night's sleep:

- Avoid sleeping with a full stomach, have at least 2 hrs of gap between dinner and sleep.
- Keep dinner light, be mindful, and avoid overeating at dinner.
- Avoid outside and processed foods after iftar.
- Walk 10-15 minutes after dinner.
- No screen time 30-60 minutes before sleep.
- Plan to sleep at the same time.
- Avoid eating and screentime during bihori namaaz. Water is okay to have.
- A 20-minute nap in the afternoon can be helpful.
- Plan to get some sleep before the Bihori namaaz.

[Click to watch video on 3-2-1 Principle To Sleep Peacefully](#)

07

COMMON QUESTIONS

COMMON QUESTIONS

1 : Best food to break the fast?

Dates are excellent for breaking the fast.

Followed by water, honey water or gol pani.
Drink it slowly in sips, not in excess.

If you have tea, please be mindful of quantity;
one small cup of 80-100 ml is enough.

If you don't drink tea, milk or harira is a good
option if it suits you.

Along with tea, if required 2 biscuits are okay.
Else you can have few dry fruits or nuts.

COMMON QUESTIONS

2 : Exercise during Ramadan?

If you are fasting with the right Mindset and following the guidelines mentioned, special exercise is not required. (unless prescribed for a medical health condition)

A 15-20 min walking post dinner would be helpful. Avoid excessive sitting during day.

Time must be utilized for prayers.

REMEMBER:

The important exercise is training the MIND.

3 : How to avoid constipation?

If you fast with the right mindset, and avoid all mistakes, you will not experience constipation. *(fewer than three bowel movements a week or hard and dry stools)*

Motion frequency can change, it can be alternate days if not daily.

Having 3-4 prunes before sleep or 1-2 soaked figs in the morning can be helpful. Have it only 2-3 times a week, not daily.

In case of severe constipation, herbal laxatives can be used under medical supervision.

[Click here to watch 2 Part Video on Constipation Fix](#)

4 : How can I feel more energtetic?

Fasting the right way boosts your energy, but **stress, worry, and anxiety can drain it.**

Your breath is a powerful tool—it helps calm your mind, reduce stress, and keep you focused.

By practicing proper breathing, you can shift from tension to relaxation, restoring a sense of peace and balance in your body.

Breathe Right, stress less, and feel more energized!

[Click here to watch YouTube video on breathing.](#)

5 : Food for Sehri & Iftar?

Local homecooked food for sehri - Roti, paratha, curd, milk, egg paneer, hummus, dry fruits, rolled oats, and other local foods.

Iftar and dinner - Be mindful and avoid overeating, focus on eating slowly and chewing well.

Avoid eating late at night, processed foods and eating extra foods after dinner.

Bihori - If required have a glass of milk and drink water. Avoid eating solid foods.

6 : Guideline for summer season.

The digestive system is weak during the summer seasons.

It is important to **avoid filling the stomach with excess food**. Have more fluids and add cooling foods.

Cooling foods as per Unani System: Rice, beans, lentils, lettuce, cucumber, barley, potatoes, sprouts, peas, beets, coconut, cow's milk, buttermilk, butter, yogurt (homemade), ghee, fig, pomegranate, apricot, orange, apple, melons, peach, pear.

All other foods can be taken in moderation.

For cold season : Meat, eggs, paneer, ghee, olive oil, cream, squash, beans, legumes, wheat, potatoes, dry fruits, herbs & spices.

7 : Intermittent fasting (IF) same as Rozah?

IF and Ramadan Rozah are not the same.

Ramadan Rozah is observed from dawn to dusk for spiritual growth and self-discipline.

In contrast, IF is a **diet trend** aimed at weight loss or **short-term** health benefits.

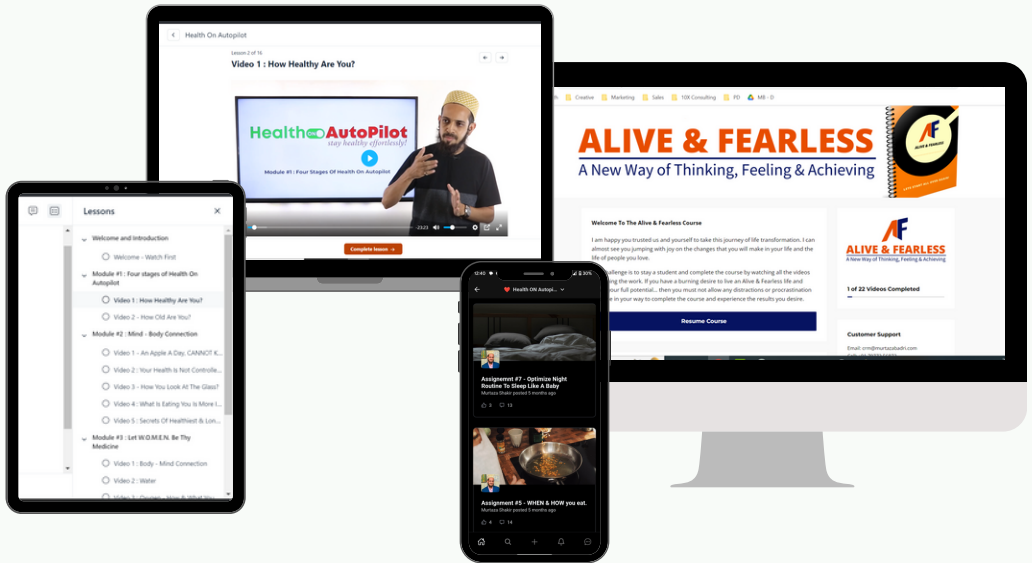

It usually involves skipping meals like breakfast and dinner within a set "eating window," which can lead to overeating, digestive issues, and **long-term** physical & mental health problems.

Fasting isn't just about when you eat, but also why you do it.
